SKILLS

React, Redux, Ruby, Rails, Javascript, Typescript, HTML, CSS, jQuery, MongoDB, Express, Node.js, Mongoose, PostgreSQL, Webpack, Git, Heroku, AWS

PROJECTS

[Live](#) | [Github](#)

MeetGreet // React, Redux, Ruby on Rails, CSS, Typescript

Full stack clone of Meetup, a platform for joining groups and attending events

- Designed and implemented back-end database for users, groups, and events, along with API endpoints for front-end rendering, fetching, authentication, and searching
- Incorporated AWS S3 for photo storage, allowing users to set custom avatars
- Utilized Typescript with the latest versions of React, React Router, and Redux libraries to provide robust front-end state management and a smooth user experience

[Live](#) | [Github](#)

JS Billiards // Javascript, HTML

Simple browser billiards game created with Javascript and HTML Canvas

- Employed Canvas API to render dynamic animations and real-time display
- Developed game interface with collision detection and intuitive controls
- Built game loop for two players with victory conditions and turn logic based on standard 8-ball rules

WORK EXPERIENCE

Assistant Editor

April 2019 - Present

Zero Point Zero Productions

- Logged, synced, organized and prepped terabytes of footage
- Fulfilled various post-production requests from editors, producers, and directors
